Subclass of:	rdf-schema#Resource

Class: Genre/Form

URI:	http://myee.bol.ucla.edu/ycrschema#Genre/form
Label:	genre/form
Subclass of:	rdf-schema#Resource

Property: Key Identifier for Work

URI:	http://myee.bol.ucla.edu/ycrschema#keyidwork
Label:	key identifier for work

Domain:	ycrschema:Work
Cardinality	OWL 3.4.2: A work has exactly one unique key identifier

Property: Language-based Identifier (Preferred Lexical Label)

URI:	http://www.w3.org/2004/02/skos/core#prefLabel
Label:	language-based identifier (preferred lexical label)
Domain:	rdfs:Resource
Subproperty of:	rdfs:label
Cardinality	OWL 3.4.2: A resource has exactly one unique language-based identifier (lexical label) per BCP 47 language tag

Note: follow SKOS prefLabel pattern in allowing one (and only one) prefLabel per BCP 47 language tag. Question: How can OWL cardinality rule be adapted to apply to prefLabel plus BCP 47 language tag?

Property: Variant Language-based Identifier (Alternate Lexical Label)

URI:	http://www.w3.org/2004/02/skos/core#altLabel
Label:	variant language-based identifier (alternate lexical label)
Domain:	rdfs:Resource
Subproperty of:	rdfs:label

Note: follow SKOS altLabel pattern in adding BCP 47 language tags to each variant language-based identifier

Property: Language-based Identifier (Preferred Lexical Label) for Work

URI:	http://myee.bol.ucla.edu/ycrschema#langidwork
Label:	language-based identifier (preferred lexical label) for work
Domain:	ycrschema:Work
Subproperty of:	skos:prefLabel
Cardinality	OWL 3.4.2: A work has exactly one unique language-based identifier (lexical label) per BCP 47 language tag

Note: follow SKOS prefLabel pattern in allowing one (and only one) langidwork per BCP 47 language tag. Question: How can

OWL cardinality rule be adapted to apply to langidwork plus BCP 47 language tag?

Property: Language-based Identifier for Work (Preferred Lexical Label) Identified by PrincipalCreator in Combination with Uniform Title

URI:	http://myee.bol.ucla.edu/ycrschema#langidworkpcut
Label:	language-based identifier (preferred lexical label) for work identified by principalcreator in combination with uniform title
Domain:	ycrschema:Work
Subproperty of:	ycrschema:langidwork
Functional property	OWL 3.3.3 each work has no more than one language-based identifier for work identified by principalcreator in combination with uniform title per BCP 47 language tag

Note: As defined in the cataloging rules, this consists of the combination of principalcreator (if present) and the uniform title for the work in a single identification string which will have to be maintained manually (without global updating) as the principalcreator identification changes over time. This is necessary because the RDF model is not sophisticated enough to treat one part of the language-based identifier for the work (the creator part) as an entity in its own right. Question: OWL 3.3.3 example in the owl-guide has an rdfs range statement. Is that required? If so, how define it here?

Property: Language Based Identifier (Preferred Lexical Label) for Work Identified by Title Alone (Uniform Title)

URI:	http://myee.bol.ucla.edu/ycrschema#langidworkut
Label:	language based identifier (preferred lexical label) for work identified by title alone (uniform title)
Domain:	ycrschema:Work
Subproperty of:	ycrschema:langidwork
Functional property	OWL 3.3.3 each work has no more than one language based identifier (preferred lexical label) for work identified by title alone (uniform title) per BCP 47 language tag

Property: Supplied Title for Work

URI:	http://myee.bol.ucla.edu/ycrschema#supptwork
Label:	supplied title for work
Domain:	ycrschema:Work
Subproperty of:	rdfs:label

Property: Variant Title for Work

URI:	http://myee.bol.ucla.edu/ycrschema#vartwork
Label:	variant title for work
Domain:	ycrschema:Work
Subproperty of:	skos:altLabel

Note: follow SKOS altLabel pattern in adding BCP 47 language tags to each variant title

Property: Variant Title for Work – Alternate Title

URI:	http://myee.bol.ucla.edu/ycrschema#vartaltwork
Label:	variant title for work – alternate title
Domain:	ycrschema:Work
Subproperty of:	Ycrschema:vartwork

Property: Variant Title for Work – Parallel Title

URI:	http://myee.bol.ucla.edu/ycrschema#vartparwork
Label:	variant title for work – parallel title
Domain:	ycrschema:Work
Subproperty of:	Ycrschema:vartwork

Property: Variant Title for Work – Part Title For Work Identified by Whole-Part Title

URI:	http://myee.bol.ucla.edu/ycrschema#vartpartwork
Label:	variant title for work – part title for work identified by whole-part title
Domain:	ycrschema:Work
Subproperty of:	Ycrschema:vartwork

Property: Variant Title for Work – Portion of Title

URI:	http://myee.bol.ucla.edu/yocrschema#vartporwork
Label:	variant title for work – portion of title
Domain:	yocrschema:Work
Subproperty of:	Yocrschema:vartwork

Property: Variant Title for Work – Subtitle

URI:	http://myee.bol.ucla.edu/yocrschema#vartsubtwork
Label:	variant title for work – subtitle
Domain:	yocrschema:Work
Subproperty of:	Yocrschema:vartwork

Property: Variant Title for Work – Title With Variant Spelling

URI:	http://myee.bol.ucla.edu/yocrschema#vartspwork
Label:	variant title for work – title with variant spelling
Domain:	yocrschema:Work
Subproperty of:	Yocrschema:vartwork

Property: Variant Title for Work – Title With Numerals Spelled Out

URI:	http://myee.bol.ucla.edu/yocrschema#vartnumspwork
Label:	variant title for work – title with numerals spelled out
Domain:	yocrschema:Work
Subproperty of:	Yocrschema:vartwork

Property: Variant Title for Work – Title With Spelled Out Numerals Given As Numbers

URI:	http://myee.bol.ucla.edu/yocrschema#vartspnumwork
Label:	variant title for work – title with spelled out numerals given as numbers
Domain:	yocrschema:Work
Subproperty of:	Yocrschema:vartwork

Property: Creator to Work Relationship: Principal Creator

URI:	http://myee.bol.ucla.edu/yocrschema#principalcreator
Label:	creator to work relationship: principal creator

Domain:	ycrschema:Work
Range:	Union of ycrschema:Person or ycrschema:Corporatebody
Functional property	OWL 3.3.3 each work has no more than one principal creator

Property: Creator to Work Relationship: Secondary Creator

URI:	http://myee.bol.ucla.edu/ycrschema#secondarycreator
Label:	creator to work relationship: secondary creator
Domain:	ycrschema:Work

Cardinality	OWL 3.4.2: An expression links to exactly one work

Note: A given expression may have more than one expression to work relationship, as in the case of a translation that is also a revised edition.

Question: Is it possible to require that every expression link to only one work? (In other words, is it possible to forbid one expression

from linking to two or more works?) Is this the correct use of the OWL cardinality feature?
